## DETAILED ACTION

### *Continued Examination Under 37 CFR 1.114*

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 9/28/06 has been entered.

### *Allowable Subject Matter*

1. **Claims 1-20 and 22-25 are allowed.**

The following is an examiner's statement of reasons for allowance: Claims 1-20 and 22-25 are allowed since certain key features of the claimed invention are not taught or fairly suggested by prior art. **In claim 1**, “processing each acquired image to determine the position of said pointer therein and recording the position together with a timestamp representing the time elapsed between a reference point common to said cameras and the time the image was acquired, and interpolating between pairs of recorded positions to generate interpolated positions and recording each interpolated position together with a synchronization time representing a time each image would have been acquired had said cameras been synchronized”. **In claim 9**, “interpolating between successive pairs of recorded positions to generate interpolated positions and recording said interpolated positions together with synchronization times representing times”

Art Unit: 2629

the images would have been acquired had said cameras been synchronized; and determining interpolated positions generated by said cameras having equivalent associated synchronization times and triangulating the interpolated positions to estimate the position of the said pointer relative to said touch surface". In claim 22, "wherein each camera processes each image acquired thereby to determine the position of the object therein and records the position together with a timestamp representing the time elapsed between a reference point common to said cameras and the time the image was acquired, and wherein said synchronization mechanism interpolates between successive pairs of recorded positions to generate interpolated positions, the interpolated positions being recorded together with synchronization times representing times the images would have been acquired had said cameras been synchronized, said processor using interpolated positions generated by the cameras having equivalent associated synchronization times to determine the location of the object using triangulation". The closest prior art DeLuca et al. (6,559,813 B1) teach using pattern recognition and triangulation images from video cameras are used to determine position of physical objects within the space, such as the position of the user and the user's finger; Wu et al. (2005/0052427 A1) teach a system for recognizing different hand gestures made by touching a touch sensitive surface, however, singularly or in combination with other prior art, fail to anticipate or render the above underlined limitations obvious.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance.

### *Conclusion*

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Ikeda (2004/00467 A1) teaches an image recording and replay apparatus can record a line drawing in stages and can reproduce the line drawing.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mansour M. Said whose telephone number is 571-272-7679. The examiner can normally be reached on Monday through Thursday from 8:30-6:00 P.M. The examiner can also be reached on alternate Friday from 8:30 a.m. to 5:00 p.m. EST. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hjerpe, Richard A. whose telephone number is 571-272-7691.
